

# Collector Flanges

Extreme Low Profile Clamps

Ultimate Headers Low-Profile Connector Clamps provide a highly useful solution to connecting exhaust system tubing when ground and/or body clearance are problems.

Cast from the same non-corroding 316L alloy Stainless Steel material as the Ultimate Headers header flanges and collector flanges, these low-profile clamps are engineered to stand up to heat, stress and vibration of high performance engines. Additionally, these low-profile connector flanges add a special level of quality elegance to the header-exhaust system installation.

Where clearance is an issue, and strength is very important, Ultimate Headers' Extreme Low-Profile Clamps deliver outstanding performance!

## Features & Benefits

- Allow up to a 13-degree offset to facilitate easier exhaust system installation
- Uses rugged detachable, claw-style hinge
- For 2-1/2" or 3" tubes
- Includes slip-in back-up mandrel to assure leak-free, air-tight junction
- Uses ARP hex head, 5/16" stainless steel bolt, washers, nut to secure the joint
- Available in 2 finish levels
  - As cast
  - Mirror Finish
- Includes radiused flair tubing stubs
